Reform and Exploration of Integrating Ideological and Political Education Into Professional Courses

REN Jilian GAO Yanping XUE Cui'e HAO Xiaoxia WANG Jianrong

Department of Medical Laboratory, Fenyang College of Shanxi Medical University, Fenyang Shanxi 032200, China

[Abstract] Curriculum ideological and political education is a combination of science education and moral education, that is, ideological and political education is gradually integrated into the daily teaching of professional courses, so that the two are mutually permeated and integrated. In today's medical education, humanistic ideological and political education is increasingly paid attention to, and

medical laboratory technology is a branch of medicine, although it is a technical major. However, it plays a pivotal role in the diagnosis and treatment of clinical diseases, so it is also very important to integrate ideological and political education into teaching. In the examination of major courses, ideological and political elements should be fully explored to improve the understanding of ideological and political education. Teachers should conduct reform and exploration from the aspects of teaching methods and strategies, teaching content, evaluation system, etc. By enumerating examples,

have a closer combination of ideological and political education with major, and have a deeper understanding of ideological and political education in professional learning. While improving technology, we should cultivate good habits of behavior, establish a work style and professional accomplishment of being willing to contribute, rigorous academic research, daring to innovate and seeking truth from facts, and become a high-quality medical applied talents with noble quality, excellent technology and innovative consciousness.
